Success at UCSF

□ Finding support

- Mentorship needs will change over time
- Diversity of mentors including peer mentors, allies and supporters
- Shift to more independence and expanding your network
- Beyond mentorship
 - Coaching, sponsorship

Why Sponsorship?

- Complements/amplifies mentorship.
- Generativity (vs stagnation)
- Can enhance equity in career advancement (pay attention to implicit bias)

What is Sponsorship?

Active support and advocacy by a person in a strategically influential position, aimed at **protecting and championing the career advancement** of an individual.

Sponsor

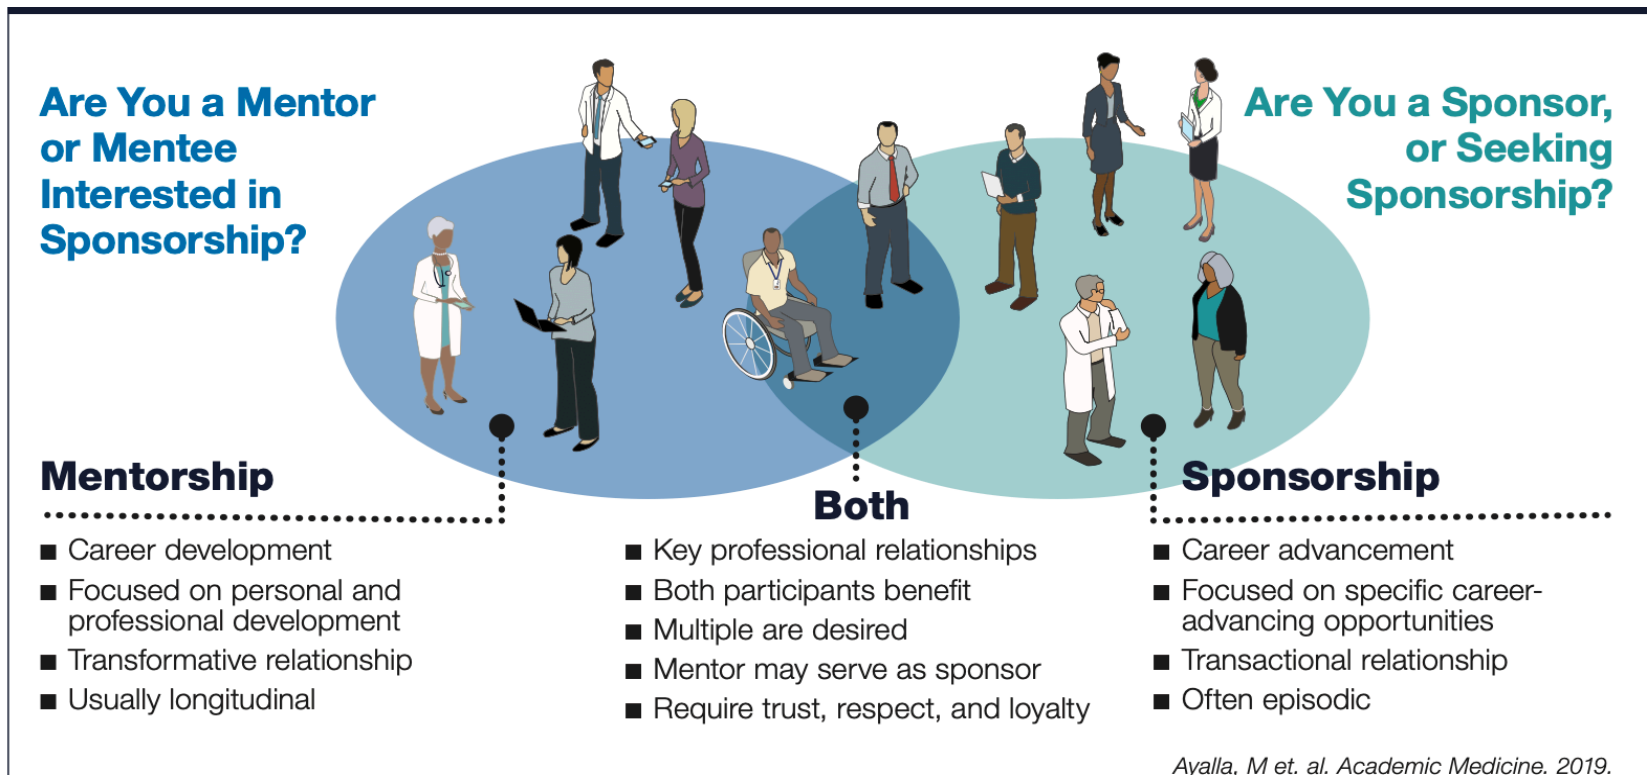

The individual (with influence within organization or in their domain) doing the sponsorship.

Sponsee

The individual receiving sponsorship

6 Common Leadership Styles — and How to Decide Which to Use When

Being a great leader means recognizing that different circumstances call for different approaches. **by Rebecca Knight**

Published on HBR.org / April 09, 2024 / Reprint [H085MC](#)

Based on a often-quoted psychologist, Daniel Goleman who first introduced these styles in his 2000 Harvard Business Review, “Leadership That Gets Results”

Much has been written about common leadership styles and how to identify the right style for you, whether it's transactional or transformational, bureaucratic or laissez-faire. But according to Daniel Goleman, a psychologist best known for his work on emotional intelligence, "Being a great leader means recognizing that different circumstances may call for different approaches."

COERCIVE LEADERSHIP STYLE

Demands immediate compliance

- Characterized by top down decision making, authoritarian approach
- May yield short term results, but has a corrosive effect in the long term
- When you might use this style:
 - Emergency or crisis situation that demands immediate action
 - In most cases, this approach is likely to be detrimental

AUTHORITATIVE LEADERSHIP STYLE

Not to be confused with authoritarian leadership

- Characterized by motivating your team members by connecting their work to a larger organizational strategy
- Connect how day to day work contributes to a greater purpose
- Sets guidelines (versus micromanaging) and enables team members to work towards goals with shared vision and autonomy
- When you might use this style:
 - Applicable to many situations, especially useful during change/transition

PACESETTING LEADERSHIP STYLE

Holds leader and others to high standard

- Characterized by striving for excellence
- Can backfire if focus is more on (perfection) and failures rather than successes
- Constant push for productivity can create a pressure cooker environment and make it difficult for employees to see how their individual contributions are important
- When to use this:
 - Works in circumstances where employees are highly motivated and competent
 - Should be used infrequently and balanced with other styles

AFFILIATIVE LEADERSHIP STYLE

Focuses on emotional connections

- Involves building strong emotional bonds and a sense of camaraderie and team spirit; fosters a positive and supportive workplace
- Creates environment where members feel belonging and can freely share ideas/feedback and work towards common goals
- When to use:
 - Creates positive culture but should not be used in isolation
 - May not provide sufficient feedback to address performance issues or deal with complex challenges

DEMOCRATIC LEADERSHIP STYLE

Invites input and feedback

- Characterized by empowering your team to have a voice in decision making
- Takes time to gather input, listen to concerns and diverse perspectives and incorporate feedback
- Fosters a sense of being heard/valued and ownership and responsibility
- When to use:
 - Ideal when you're unsure about the best course of action and you want to generate ideas
 - Not a good strategy when team lacks experience/information

COACHING LEADERSHIP STYLE

Focused on individual growth

- Characterized by dedicating time to understand a team member's long term goals both for professional and personal development
- Takes genuine interest in a persons development, leads to fempolyee feeling valued and motivated
- When to use:
 - Especially useful during 1:1 performance evaluations, but you can also integrate into more informal/daily conversations for real-time feedback

HOW TO ADAPT YOUR LEADERSHIP STYLE TO FIT THE SITUATION

Daniel Goleman

- “The most effective leaders switch flexibly among the leadership styles as needed...[They] don’t mechanically match their style to fit a checklist of situations—they are far more fluid. They are exquisitely sensitive to the impact they are having on others and seamlessly adjust their style to get the best results..”

Foundations for Excellence in Physician Leadership

The Foundations for Excellence in Physician Leadership program is a nine-month initiative for physicians early in their leadership journey.

This program will leverage participants' current role to provide them with the foundational skills, knowledge and awareness not only to effectively lead a clinical team, but also to navigate the administration of health care.

This program includes pre-work, nine three-hour monthly leadership learning sessions, executive coaching, project-based learning and planned networking luncheons. Expert facilitators, industry leaders and executive coaches will aid in fostering the participants' leadership development, reflective practice and career mapping.

Outcomes for the Foundations for Excellence in Physician Leadership program include:
